

2004 INTERVIEW WITH ED SKILLING

Excerpts

INTERVIEWER: Ed, tell us about yourself.

SKILLING: In 1959 I founded the original Ed Skilling Institute of Technology and in 1983, I started my own manufacturing company called E.F. Skilling, Inc. **I re-invented Rife technology applying electronics which did not exist in Rife's time. The very first instrument we developed got better results than anything in the history of electro-medicine.**

INTERVIEWER: Okay. Can you talk about the Noble gas tubes that come along with the Photon-Genie?

SKILLING: The gas tubes were developed to move and balance fluids in the body, blood, lymph, etc., to increase and balance circulation, and more efficient movement of lymphatic fluid, urine and intestinal waste, increasing the balance and flow of fluids wherever the energy transmitters or gas tubes are placed. The main problem when you become ill, **is that you create even more toxins in the body.** The bacteria, germs and viruses in the body also create more toxins and all of these toxins make you feel increasingly worse and more uncomfortable. So, the dynamic movement and balancing of fluids by the Photon-Genie eliminates congestion and blockages naturally and more quickly.

INTERVIEWER: We understand that it also ozonates and oxygenates the blood, as well?

SKILLING: Through this dynamic movement and balance of fluids there is more efficient absorption and utilization of oxygen by the body. The long-term use of the gas tubes transmits ozone through the skin and tissues to the blood stream. We have experts in dark-field microscopy which indicate that, within a short period of time after these tubes have been placed on the skin, there is a noticeable positive affect on the blood. **The blood can most noticeably be improved within 90 days and may be improved more with longer use.**

INTERVIEWER: Can we discuss some of the results of using this particular instrument?

SKILLING: Well, the majority of people have eliminated large lumps that have been created by blockages in the lymph nodes. That also includes lumps that have appeared in the breasts and other parts of the body. In countless cases, people have reported reduction of all types of pain and noticeable improvement of a variety of symptoms with daily consistent use within weeks to months depending on the length of time they have had the conditions or symptoms and depending on other complications involved.

INTERVIEWER: What's the difference between this technology and other alternatives?

SKILLING: The majority of alternatives are substances that must be taken into the body from the outside and their effectiveness depends on the efficiency of the digestive system and assimilation for effective utilization by internal systems of the body. The breakdown and in-efficiency of these processes are part of the cause of most degenerative diseases.

It's no wonder that these good alternatives have a difficult time getting people completely over serious conditions. **The Photon-Genie transmits directly to the cells and from the inside out does not depend on digestion or other weakened processes of the body. It powers-up and balances the energy level of the cells which increases the power and efficiency of the organs and systems of the entire body.**

INTERVIEWER: Do you have any final comments?

SKILLING: All organs and systems of the body are controlled by the cells. **They now know that every cell of the body is like a little battery and their functions are controlled by this energy.** When the cells get low and drained of energy all functions of the body are compromised and become less effective. **By electronically, gradually charging and balancing the energy field of the cells, the effectiveness and performance of all tissues, organs and systems of the body are improved. My life's work and dedication has been to develop the ultimate technologies that will generate these results.** The Photon-Genie is the culmination of over 50 years of Research and Development and is the most powerful technology available to accomplish these results in the human body.

INTERVIEWER: Thank you for your outstanding work.
